Key Word Index

A

Acquisition and extinction
contingent negative variation; fear-related stimuli; phobias, 253

Activation
effort; electromyography; heart rate; playfulness; seriousmindedness; threat, 155

Alpha
electroencephalogram; hemispheric asymmetry; attention; beta, 43

Alpha activity
EEG; emotionality; attention; beta activity, 33

Arousal
war; electrodermal measures; heart rate; heart rate variability; stress; salivary function; aversive visual stimulus; sex differences; locus of control, 237

Attention
EEG; emotionality; alpha activity; beta activity, 33
elctroencephalogram; hemispheric asymmetry; alpha; beta, 43

Attentional deficit disorder
event-related potential; P3; reading disability; learning disability, 263

Auditory evoked potentials
recovery cycle; habituation; two-tone paradigm; rhythmicity, 23

Auditory evoked response
intracortical potential fields; wakefulness–sleep cycle; cat, 171

Auditory stimulation
depression; psychophysics; behavioural theories; subjective pleasure; positive reinforcement, 205

Augmenting-reducing
EEG; evoked potentials; introversion; extraversion; pain; personality, 299

Averaging
neuronal activity; neurophysiological correlates; mental operations; humans; psychological tasks; single-trial response, 275

Aversive pictures
phasic stimulus; tonic stimulus; habituation; transswitching; conditioning; skin conductance response (SCR); heart rate (HR); unelicited skin conductance response; trait anxiety; emotion, 227

Aversive visual stimulus
war; electrodermal measures; heart rate; heart rate variability; arousal; stress; salivary function; sex differences; locus of control, 237

B

Behavioural theories
depression; psychophysics; auditory stimulation; subjective pleasure; positive reinforcement, 205

Bereitschaftspotential
CNV; slow brain potentials; event-related potentials; reversible figures; Necker cube; distraction, 5

Beta
electroencephalogram; hemispheric asymmetry; attentional alpha, 43

Beta activity
EEG; emotionality; attention; alpha activity, 33

Biofeedback
EEG alpha symmetry; covert mental activity; subjective rating, 163
ethics; operant autonomic conditioning, 211

Biofeedback training
fatigue; epilepsy; EEG; sensorymotor rhythym, 81

Brain potential
visual evoked potential; saccade; semantic categorization, 131

Brainstem
perception; reticular formation; reafference; imagery, 101

C

Cardiovascular response
stress research; order effects; interference, 67

Cat
Auditory evoked response; intracortical potential fields; wakefulness–sleep cycle, 171

CNV
Bereitschaftspotential; slow brain potentials; event-related potentials; reversible figures; Necker cube; distraction, 5

Command for action
movement-related brain potentials; voluntary flexion/extension; sustained isometric contraction; preceding negativity; following positivity; general facilitation, 13

0167-8760/86/$03.50 © 1986 Elsevier Science Publishers B.V.

Conditioning
phasic stimulus; tonic stimulus; habituation; transswitching; skin conductance response (SCR); heart rate (HR); unelicited skin conductance response, aversive pictures; trait anxiety; emotion, 227

Contingent negative variation
acquisition and extinction; fear-related stimuli; phobias, 253

Covert mental activity
EEG alpha symmetry; biofeedback; subjective rating, 163

D

Depression
psychophysics; behavioural theories; auditory stimulation; subjective pleasure; positive reinforcement, 205

Difficulty level
graded mental arithmetic; effortful active coping; heart rate; oxygen comsumption; difficulty level, 307

Distraction
Bereitschaftspotential; CNV; slow brain potentials; event-related potentials; reversible figures; Necker cube, 5

E

EEG
EEG analysis; EEG in children; EEG regulation; EEG dysrhythmia, 145
emotionality; attention; alpha activity; beta activity, 33
evoked potentials; augmenting-reducing; introversion; extraversion; pain; personality, 299
fatique; epilepsy; sensorymotor rhythym; biofeedback training, 81

EEG alpha symmetry
biofeedback; covert mental activity; subjective rating, 163

EEG analysis
EEG; EEG in children; EEG regulation; EEG dysrhythmia, 145

EEG dysrhythmia
EEG; EEG analysis; EEG in children; EEG regulation, 145

EEG in children
EEG; EEG analysis; EEG regulation; EEG dysrhythmia, 145

EEG regulation
EEG; EEG analysis; EEG in children; EEG dysrhythmia, 145

Effort
activation; electromyography; heart rate; playfulness; serious mindedness; threat, 155
orienting; habituation; electrodermal activity; laterality; cardiovascular disorders; hippocampus, 219

Effortful active coping
graded mental arithmetic; heart rate; oxygen consumption; difficulty level, 307

Electrodermal activity
orienting; habituation; laterality; effort; cardiovascular disorders; hippocampus, 219

Electrodermal measures
war; heart rate; heart rate variability; arousal; stress; salivary function; aversive visual stimulus; sex differences; locus of control, 237

Electroencephalogram
hemispheric asymmetry; attention; alpha; beta, 43

Electromyography
activation; effort; heart rate; playfulness; serious mindedness; threat, 155

Emotion
phasic stimulus; tonic stimulus; habituation; transswitching; conditioning; skin conductance response (SCR); heart rate (HR); unelicited skin conductance response; aversive pictures; trait anxiety, 227

Emotional experience
heart beat interoception; visceral perception, 57

Emotionality
EEG; attention; alpha activity; beta activity, 33

Epilepsy
fatigue; EEG; sensorymotor rhythym; biofeedback training, 81

Error and speed theories
evoked potential characteristics and intelligence; evoked potential complexity; string measure, average voltage and third-peak latency, 1

Ethics
biofeedback; operant autonomic conditioning, 211

Event-related potential
N1, P2, N2, P3; information processing; stimulus identification, 121
P3; attentional deficit disorder; reading disability; learning disability, 263

Event-related potentials
Bereitschaftspotential; CNV; slow brain potentials; reversible figures; Necker cube; distraction, 5

Evoked potential characteristics and intelligence
error and speed theories; evoked potential complexity; string measure; average voltage and third-peak latency, 1

Evoked potential complexity
evoked potential characteristics and intelligence; error and speed theories; string measure, average voltage and third-peak latency, 1

Evoked potentials
EEG; augmenting-reducing; introversion; extraversion; pain; personality, 299

Extraversion
EEG; evoked potentials; augmenting-reducing; introversion; pain; personality, 299

F

Fatigue
epilepsy; EEG; sensorymotor rhythym; biofeedback training, 81

Fear-related stimuli
contingent negative variation; acquisition and extinction; phobias, 253

Following positivity
movement-related brain potentials; voluntary flexion/extension; sustained isometric contraction; preceding negativity; general facilitation; command for action, 13

G

General facilitation
movement-related brain potentials; voluntary flexion/extension; sustained isometric contraction; preceding negativity; following positivity; command for action, 13

Graded mental arithmetic
effortful active coping; heart rate; oxygen consumption; difficulty level, 307

H

Habituation
heart rate; light onset; light offset; orienting reflex theory; infant rats, 183
orienting; electrodermal activity; laterality; effort; cardiovascular disorders; hippocampus, 219
phasic stimulus; tonic stimulus; transswitching; conditioning; skin conductance response (SCR); heart rate (HR); unelicited skin conductance response; aversive pictures; trait anxiety; emotion, 227
recovery cycle; auditory evoked potentials; two-tone paradigm; rhythmicity, 23
visual ERP; orienting reaction; stimulus information, 287

Handedness
lateralization; H reflex; motoneuron; spinal cord; human, 75

Heart beat interoception
visceral perception; emotional experience, 57

Heart rate
activation; effort electromyography; playfulness; seriousmindedness; threat, 155
graded mental arithmetic; effortful active coping; oxygen consumption; difficulty level, 307
habituation; light onset; light offset; orienting reflex theory; infant rats, 183
war; electrodermal measures; heart rate variability; arousal; stress; salivary function; aversive visual stimulus; sex differences; locus of control, 237

Heart rate (HR)
phasic stimulus; tonic stimulus; habituation; transswitching; conditioning; skin conductance response (SCR); unelicited skin conductance response; aversive pictures; trait anxiety; emotion, 227

Heart rate variability
war; electrodermal measures; heart rate; arousal; stress; salivary function; aversive visual stimulus; sex differences; locus of control, 237

Hemispheric asymmetry
electroencephalogram; attention; alpha; beta, 43

Hippocampus
orienting; habituation; electrodermal activity; laterality; effort; cardiovascular disorders, 219

H reflex
handedness; lateralization; motoneuron; spinal cord; human, 75

Human
handedness; lateralization; H reflex; motoneuron; spinal cord, 75

Humans
neuronal activity; neurophysiological correlates; mental operations; psychological tasks; averaging; single-trial response, 275

I

Imagery
perception; reticular formation; brainstem; reafference, 101

Infants rats
habituation; heart rate; light onset; light offset; orienting reflex theory, 183

Information processing
event-related potential; N1, P2, N2, P3; stimulus indentification, 121

Interference
stress research; order effects; cardiovascular response, 67

Intracortical potential fields
auditory evoked response; wakefulness–sleep cycle; cat, 171

Introversion
EEG; evoked potentials; augmenting-reducing; introversion; extraversion; pain; personality, 299

L

Laterality
orienting; habituation; electrodermal activity; effort; cardiovascular disorders; hippocampus, 219

Lateralization
handedness; H reflex; motoneuron; spinal cord; human, 75

Learning disability
event-related potential; P3; attentional deficit disorder; reading disability, 263

Light offset
habituation; heart rate; light onset; orienting reflex theory; infant rats, 183

Light onset
habituation; heart rate; light offset; orienting reflex theory; infant rats, 183

Locus of control
war; electrodermal measures; heart rate; heart rate variability; arousal; stress; salivary function: aversive visual stimulus; sex differences, 237

M

Mental operations
neuronal activity; neurophysiological correlates; humans; psychological tasks; averaging; single-trial response, 275

Motoneuron
handedness; lateralization; H reflex; spinal cord; human, 75

Movement-related brain potentials
voluntary flexion/extension; sustained isometric contraction; preceding negativity; following positivity; general facilitation; command for action, 13

N

N1, P2, N2, P3
event-related potential; information processing; stimulus identification, 121

Necker cube
Bereitschaftspotential; CNV; slow brain potentials; event-related potentials; reversible figures; distraction, 5

Neuronal activity
neurophysiological correlates; mental operations; humans; psychological tasks; averaging; single-trial response, 275

Neurophysiological correlates
neuronal activity; mental operations; humans; psychological tasks; averaging; single-trial response, 275

O

Offset evoked potentials
P3; resolution of uncertainty, 29

Operant autonomic conditioning
biofeedback; ethics, 211

Order effects
stress research; cardiovascular response; interference, 67

Orienting
habituation; electrodermal activity; laterality; effort; cardiovascular disorders; hippocampus, 219

Orienting reaction
visual ERP; habituation; stimulus information; 287

Orienting reflex theory
habituation; heart rate; light onset; light offset; infant rats, 183

Oxygen consumption
graded mental arithmetic; effortful active coping; heart rate; difficulty level, 307

P

P3
event-related potential; attentional deficit disorder; reading disability; learning disability, 263
offset evoked potentials; resolution of uncertainty, 29

Pain
EEG; evoked potentials; augmenting-reducing; introversion; extraversion; personality, 299

Perception
reticular formation; brainstem; reafference; imagery, 101

Personality
EEG; evoked potentials; augmenting-reducing; introversion; extraversion; pain, 299

Phasic stimulus
tonic stimulus; habituation; transswitching; conditioning; skin conductance response (SCR); heart rate (HR); unelicited skin conductance response; aversive pictures; trait anxiety; emotion, 227

Phobias
contingent negative variation; acquisition and extinction; fear-related stimuli, 253

Playfulness
activation; effort; electromyography; heart rate; seriousmindedness; threat, 155

Positive reinforcement
depression; psychophysics; behavioural theories; auditory stimulation; subjective pleasure, 205

Preceding negativity
movement-related brain potentials; voluntary flexion/extension; sustained isometric contraction; following positivity; general facilitation; command for action, 13

Psychological tasks
neuronal activity; neurophysiological correlates; mental operations; humans; averaging; single-trial response, 275

Psychophysics
depression; behavioural theories; auditory stimulation; subjective pleasure; positive reinforcement, 205

R

Reading disability
event-related potential; P3; attentional deficit disorder; learning disability, 263

Reafference
perception; reticular formation; brainstem; imagery, 101

Recovery cycle
habituation; auditory evoked potentials; two-tone paradigm; rhythmicity, 23

Resolution of uncertainty
offset evoked potentials; P3, 29

Reticular formation
perception; brainstem; reafference; imagery, 101

Reversible figures
Bereitschaftspotential; CNV; slow brain potentials; event-related potentials; Necker cube; distraction, 5

Rhythmicity
recovery cycle; habituation; auditory evoked potentials; two-tone paradigm, 23

S

Saccade
visual evoked potential; brain potential; semantic categorization, 131

Salivary function
war; electrodermal measures; heart rate; heart rate variability; arousal; stress; aversive visual stimulus; sex differences; locus of control, 237

Semantic categorization
visual evoked potential; saccade; brain potential, 131

Sensorymotor rhythm
fatigue; epilepsy; EEG; biofeedback training, 81

Serious-mindedness
activation; effort; electromyography; heart rate; playfulness; threat, 155

Sex differences
war; electrodermal measures; heart rate; heart rate variability; arousal; stress; salivary function; aversive visual stimulus; locus of control, 237

Single-trial response
neuronal activity; neurophysiolgical correlates; mental operations; humans; psychological tasks; averaging, 275

Skin conductance response (SCR)
phasic stimulus; tonic stimulus; habituation; transswitching; conditioning; heart rate (HR); unelicted skin conductance response; aversive pictures; trait anxiety; emotion, 227

Slow brain potentials
Bereitschafspotential; CNV; event-related potentials; reversible figures; Necker cube; distraction, 5

Spinal cord
handedness; lateralization; H reflex; motoneuron; human, 75

Stimulus identification
event-related potential; N1, P2, N2, P3; information processing, 121

Stimulus information
visual ERP; orienting reaction; habituation, 287

Stress
war; electrodermal measures; heart rate; heart rate variability; arousal; salivary function; aversive visual stimulus; sex differences; locus of control, 237

Stress research
order effects; cardiovascular response; interference, 67

String measure, average voltage and third-peak latency
evoked potential characteristics and intelligence; error and speed theories; evoked potential complexity, 1

Subjective pleasure
depression; psychophysics; behavioural theories; auditory stimulation; positive reinforcement, 205

Subjective rating
EEG alpha symmetry; biofeedback; covert mental activity, 163

Sustained isometric contraction
movement-related brain potentials; voluntary flexion/extension; preceding negativity; following positivity; general facilitation; command for action, 13

T

Threat
activation; effort; electromyography; heart rate; playfulness; serious-mindedness, 155

Tonic stimulus
phasic stimulus; habituation; transswitching; conditioning; skin conductance response (SCR); heart rate (HR); unelicited skin conductance response; aversive pictures; trait anxiety; emotion, 227

Trait anxiety
phasic stimulus; tonic stimulus; habituation; transswitching; conditioning; skin conductance response (SCR); heart rate (HR); unelicited skin conductance response; aversive pictures; emotion, 227

Transswitching
phasic stimulus; tonic stimulus; habituation; conditioning; skin conductance response (SCR); heart rate (HR); unelicited skin conductance response; aversive pictures; trait anxiety; emotion, 227

Two-tone paradigm
recovery cycle; habituation; auditory evoked potentials; rhythmicity, 23

U

Unelicited skin conductance response
phasic stimulus; tonic stimulus; habituation; transswitching; conditioning; skin conductance response (SCR); heart rate (HR); aversive pictures; trait anxiety; emotion, 227

V

Visceral perception
heart beat interoception; emotional experience, 57

Visual ERP
orienting reaction; habituation; stimulus information, 287

Visual evoked potential
saccade; brain potential; semantic categorization, 131

Voluntary flexion/extension
movement-related brain potentials; sustained isometric contraction; preceding negativity; following positivity; general facilitation; command for action, 13

W

Wakefulness–sleep cycle
auditory evoked response; intracortical potential fields; cat, 171

War
electrodermal measures; heart rate; heart rate variability; arousal; stress; salivary function; aversive visual stimulus; sex differences; locus of control, 237
